

Early ACCESS Service Delivery Model:

What does Early
ACCESS Look Like?

Early ACCESS SERVICES

Routines

Early intervention service provider and parents/caregivers plan and practice interventions that can be used throughout the day during activities the family is already doing.

Coaching

Early intervention service provider supports family members by coaching them to help their child grow and learn.

Daily Learning

Children learn throughout the day when they are part of activities and routines – no need to create a special “therapy” time.
