

Vision, Mission, Key Principles

Vision

Every infant and toddler with or likely to have a developmental delay and their families will be supported and included in their communities so they will be healthy and successful.

Mission

Early ACCESS empowers families and caregivers through partnerships, supports, and resources to enhance children's learning and development through everyday activities and routines.

Key Principles*

1. Infants and toddlers learn best through everyday experiences and interactions with familiar people in familiar contexts.
2. All families, with the necessary supports and resources, can enhance their children's learning and development.
3. The primary role of a service provider in early intervention is to work with and support family members and caregivers in children's lives.
4. The early intervention process, from initial contacts through transition, must be dynamic and individualized to reflect the child's and family members' preferences, learning styles and cultural beliefs.
5. IFSP outcomes must be functional and based on children's and families' needs and family-identified priorities.
6. The family's priorities, needs and interests are addressed most appropriately by a primary provider who represents and receives team and community support.
7. Interventions with young children and family members must be based on explicit principles, validated practices, best available research, and relevant laws and regulations.
