| 12:30 | Aaron Cronk | Adjournment |

Future Dates: March 12, 2021, May 21, 2021

Early ACCESS Vision: Every infant and toddler with or likely to have a developmental delay and their families will be supported and included in their communities so they will be healthy and successful.

Mission: Early ACCESS empowers families and caregivers through partnerships, supports, and resources to enhance children's learning and development through everyday activities and routines.

Key Principles*

- 1. Infants and toddlers learn best through everyday experiences and interactions with familiar people in familiar contexts.
- 2. All families, with the necessary supports and resources, can enhance their children's learning and development.
- 3. The primary role of a service provider in early intervention is to work with and support family members and caregivers in children's lives.
- 4. The early intervention process, from initial contacts through transition, must be dynamic and individualized to reflect the child's and family members' preferences, learning styles and cultural beliefs.
- 5. IFSP outcomes must be functional and based on children's and families' needs and family-identified priorities.
- 6. The family's priorities, needs and interests are addressed most appropriately by a primary provider who represents and receives team and community support.
- 7. Interventions with young children and family members must be based on explicit principles, validated practices, best available research, and relevant laws and regulations.
