Iowa FFY 2021 (2021-2022) Regional Profiles Individuals with Disabilities Education Act (IDEA) Part C

Indicator C11: State Systemic Improvement Plan

SiMR (State Identified Measurable Result): Family Involvement. Percent of families reporting that Early ACCESS services helped families (C) Help their child develop and learn.

Additional data collected to assess progress toward the SiMR.

Provider:

The Coaching Fidelity Checklist and Internal Coach (IC) Activity Logs were used to measure coaches' progress on core knowledge and application competencies when coaching Early ACCESS providers in the use of Family Guided Routines Based Intervention (FGRBI). The average coaching fidelity score was 91% for FFY21, which was three percentage points higher than the previous year. In June 2022, there were three Trainee Coaches, five Provider Coaches, and eleven Master Coaches statewide, representing an increase of one Provider coach and four Master Coaches from the previous year.

The Early ACCESS providers' use of FGRBI with fidelity is measured by the implementation of the FGRBI key indicators. In the FFY 2021 nine-month coaching cycle, Early ACCESS providers demonstrated improvement and a performance value of 63% of the FGRBI key indicators observed in their first video to 61% in their third video. The first video score was to be expected; however, the drop in key indicator percentage in the third video was not. Several agencies did not have three new providers to join a cohort during the data period, so the lower third score could be the result of the lower sample size (n=48 for video 1 and n=24 for video 3). Also, the providers who did not submit a third video may have been providers who were already at fidelity, so their videos would have inflated the video 1 percentage and the absence of their third video would decrease the video 3 percentage.

Family/Child:

The Early Intervention Parenting Self-Efficacy Scale (EIPSES) was used to quantify parent responses of their ability to facilitate positive child outcomes within the context of early intervention programs and via interactions with early intervention providers (scale from 1 to 7). The data reported in FFY 2021 continued to indicate high caregiver competence (Mean = 5.77, Median = 5.75) and confidence (Mean = 5.58, Median = 5.50) related to child outcomes while also reflecting a higher use of FGRBI key indicators by Early ACCESS providers. Data from FFY21 had a response rate of 46% (n = 35), which is lower than the previous year (FFY20 = 71%).

System:

Early ACCESS regional and state system progress was measured through written reports submitted by Early ACCESS Regional Grantees. Regional implementation team reports were updated four times during FFY 2021, discussed at Early ACCESS Grantee Leadership team meetings, and reviewed by the Early ACCESS State Team. In previous years, the Regions had identified organizational barriers which included involving occupational and physical therapists, finding resources to support Internal Coaches, and allocating time to engage in effective teaming practices. In FFY 2021, the Early ACCESS Regional Grantees reported barriers related to sustainability efforts and staff learning Iowa's IDEA data system, ACHIEVE.
